

WESTWIND GEOLOGY CAMP

**Geology Natural History Camp
at Westwind on the Oregon Coast**

JUNE 9–11, 2017
all ages, \$300 adult/\$150 child

The Pacific Northwest abounds with dramatic geologic history. *Where did all the sand come from, and how did the dramatic coastal headlands form? Who poked holes in those dark rocks on the beach, and which forested hills are actually ancient dunes? How should we prepare for the massive earthquakes and tsunamis that are forecasted to hit the Oregon coast?*

Come to Westwind and learn from professional geologist Brian Atwater (University of Washington and USGS Fellow) about Oregon's exciting coastal natural history. Learn from Westwind staff and emergency experts how to prepare for the next 'Big One.' Relax in Westwind's oceanside lodge and experience Geology Camp!
